

SmartBoard Sound and Video Settings for the Mac OS:

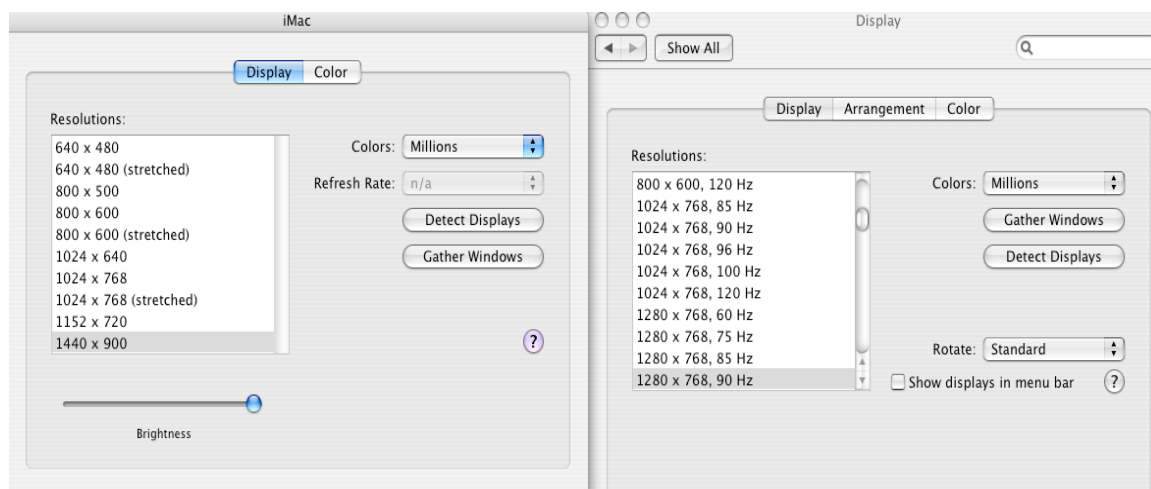

If you have trouble with the **sound** on the Smartboard, check here first.

To get here: Apple>System Preferences>Sound...click on the second tab -Output

If you have trouble with the **resolution** of your computer/projector (everything is too large or small) you need to confirm these settings.

Apple>System Preferences>Display

iMac Display should be 1440x900 and the Display should be 1280X768 90Hz

Arrangement: must be set to mirror displays!
